

PROFILE

Product designer with 6+ years in enterprise B2B SaaS, translating complex concepts into simple solutions. I design integrations, dashboards and design system patterns for complex platforms, from first concept to shipped product, and build working prototypes with AI tools to test ideas faster.

EXPERIENCE

Jan 2024
to present

SAP LeanIX Product Designer

- Designed and shipped the Jira and SuccessFactors integrations from scratch, and improved the Signavio integration, which doubled its active users.
- First dedicated designer on the Jira integration team; brought a design process into a team used to shipping without design.
- Helped streamline integration patterns so new integrations follow one consistent model.
- Designed the Executive Architecture dashboard and improved the AI generated dashboard flow: configuration panels, panel management and flexible panel positioning.
- Design System Champion: maintained components, defined interaction patterns and helped migrate the product to SAP UI5 components.
- Designing across the integrations tribe, currently on ServiceNow and Signavio.

Nov 2020
to Dec 2023

Seyfor UX/UI Designer

- Designed and shipped four products from scratch: mojaMALICA (meal sign-up app used by schools and institutions), mojInfo (modern web HR app built on a legacy ERP), mojPOS (point of sale system) and a commissioned app for a butchery.
- Designed features and improvements for the company's established desktop ERP.
- Created the first documentation of components and core patterns for the legacy ERP, and contributed to the design system for the new web apps.
- Worked on the design of a new web ERP alongside business analysts and developers.

Nov 2018
to May 2020

Alfastreet Game Designer

Designed graphics, interfaces and in-game animations for casino games, with multi-language support, working closely with product managers and developers.

2015 to 2019
